

Lanzo Premium Rack

The Top Class Rack System

Our Premium Racks answer the highest claims! The plastic we use is a very good insulating, highly solid and robust PVC panel. We use only extra strong panel material for optimum heat insulation and stability! Heating of these racks is realized by energy efficient panel heating – so-called heat tapes. The full-plastic construction guarantees absolute humidity resistance – no upwelling, no mould, no rot! We recommend our Microclimate Thermostats for temperature control!

Lanzo Premium Rack type „CB7081“

We present our new rearing rack CB7081 providing new options for you: Every layer offers room for five boxes. And you choose how many layers your rack will have. A maximum of five layers is available. As individual box we offer the Clearbox 7081, size 33 x 19 x 11 cm made by Rotho. Every layer is already equipped with a heat tape which is included in the price!

Width: ca. 98 cm Depth: ca. 35 cm Height: ca. 13 cm (add 12 cm height for every additional layer)

Lanzo Premium Rack type „CB4047“

This rack was created at suggestion of several ball python breeders, who were looking for an intermediate size. We spent some time for an in-depth search for a particularly suitable container size and ended up with the Clearbox 4047 made by Rotho. This box has the size 70 x 40 x 15.5 cm and is ideally suited for rearing snakes. It's original condition is without ventilation holes so they have to be added by yourself. For heating purposes we developed a completely new heat tape, the HT 15/79, which heats up two side by side containers. One rack module provides room for six boxes. Up to three modules can be stacked.

Size of module: ca. 82 x 71 x 56 cm.

Lanzo Premium Rack type Arbo Rack II

Our new Arbo Rack II is part of the Premium Rack family and serves to accommodate tree-dwelling snakes which grow too big to keep them in the rearing system Arbo Rack I further on. Every module provides room for four containers. The heat tapes are mounted at the back for an optimum heating.

Size of module: ca. 78 x 56 x 70 cm / 4 compartments each 37 x 54 x 31 cm

Lanzo Premium Rack type „IK-KO“

We developed our rack type "IK-KO" according to multiple customer's request to fit the IKEA Komplement Box 100x58cm. This reasonably priced and very large box measuring 92x55x18cm is available in every IKEA department store. We use a 13 mm (!) thick PVC panel as material, because the size of the rack makes such a strong panel inevitable!

You can choose how many compartments/layers your rack will have, up to five layers are possible, two racks can be stacked on each other. Heating is already included in the price. **Like all other racks we furnish this Premium Rack with high-quality heattapes that guarantee a consistent warming.**

Our racks provide the perfect accommodation for your reptiles! Closed rack systems like our Premium series generate a steady temperature gradient because they prevent the loss of heat. Ordinary rack stands lose the generated heat before it can spread within the container. This leads to higher use of energy or insufficient temperatures. In addition your snakes get a high feeling of security only in closed racks which is particularly important for example for ball pythons.

We urgently recommend a sustainable base for your racks. We offer it measuring 97 x 59 x 10 cm.

Exterior size of rack module: 97 x 59 x 21 cm. Add 19.5 cm for every additional layer.
